- Successfully launch the website and provide training on how to use it and support them if have any questions, resulting in improved sales for the customer.

PROJECTS

WEB GAME

JOASIS WORLD

- Created a dynamic and immersive web game using JavaScript, HTML and CSS that serves as a comprehensive portfolio of my skills and accomplishments.
- Invested six months of dedicated effort to independently develop a captivating web game, showcasing my technical expertise and creativity.
- Implemented interactive features within the game, allowing users to explore my background and engage with various Non-Playable Characters (NPCs) to learn more about my professional journey.

AWARDS AND ACHIEVEMENTS

[UMS Final Year Project Competition](#)

2022

First Place

A competition that held from my university (University Malaysia Sabah) where all the students will present their final year project. With fierce competition among talented students, I showcased my exceptional skills and innovative project, ultimately emerging as the victorious winner.

[UniKL International Final Year Project Competition & Exhibition 2022 \(ICPEX\)](#)

2022

Gold Trophy Award & Best Project Award

In this rigorous competition, I engaged in intense competition with 20 teams representing various universities, all vying for the coveted 1st place. Through unwavering dedication and relentless effort, I successfully secured the prestigious Gold Trophy Award and earned recognition for having the Best Project.
